Green IT: Reduce Your Information System's Environmental Impact While Adding to the Bottom Line—Toby Velte 2008-10-31 An estimated 400 million units of obsolete electronics are scrapped annually in the U.S. Virtualization can save an organization $560 annually in electricity costs per server; this book covers virtualization and other energy-saving techniques A green IT organization can reduce operation costs, increase employee retention, and improve brand image in the market place

Fabricated—Hod Lipson 2013-01-22 Fabricated tells the story of 3D printers, humble manufacturing machines that are bursting out of the factory and into schools, kitchens, hospitals, even onto the fashion catwalk. Fabricated describes our emerging world of printable products, where people design and 3D print their own creations, not just for fun but directly and accessibly as they edit an online document. A 3D printer transforms digital information into a physical object by carrying out instructions from an electronic design file, or blueprint. Guided by a design file, a 3D printer lays down layer after layer of a raw material to print out an object. That's not the whole story, however. The magic happens when you plug a 3D printer into today's mind-boggling digital technologies. Add to that the Internet, tiny, low-cost electronics, and curious advances in materials science and biotech and you have Fabricated. The result is an explosion of technological and social innovation. Fabricated takes the reader on a rich and fulfilling journey that explores how 3D printing is poised to impact nearly every part of our lives. Aimed at people who enjoy books on business strategy, popular science and novel technology, Fabricated will provide readers with practical and imaginative insights to the question: how will this technology change my life? Based on hundreds of hours of research and dozens of interviews with experts from abroad range of industries, Fabricated offers readers an informative, engaging and fast-paced introduction to 3D printing now and in the future.
